Re : Application No. 10/675,764
Art Unit 1743

Dear Dr. Yelena G. Gakh :

In response to the Office action dated 06/20/2007, we, the applicant, would like to elect the carboxylic acid $R_1\text{COOH}$ in which R_1 is an alkyl group as the elected species. A specific example of the elected species is 2-(3-benzoylphenyl)propionic acid whose chemical structure is shown in the following drawing :

This acid species is allowed to react with ethyl chloroformate and ethanol-d5 in the presence of sodium carbonate to give the ethyl ester-d5 with the chemical structure shown in the following drawing :

The above ethyl ester-d5 is used as the stable isotope labeled internal standard. The acid in the sample is allowed to react with ethyl chloroformate and ethanol in the presence of

sodium carbonate to from ethyl ester with the chemical structure shown in the following drawing :

The above underlined reagents are the requested elected species. Analysis by mass spectrometry of the ethyl ester and the ethyl ester-d5 then provides the concentration of the ethyl ester which is assumed to be the concentration of the carboxylic acid in the sample.

In our last correspondence with the office, we did not fully understand the point made by the office. As the result we asked to amend the specification for the purpose of clarification of the claims without introducing new matter. Now that we elect the species as requested, we feel that the previous amendment is unnecessary. So we hereby ask the office to allow us to cancel our previous amendment and re-introduce our original specification. The claim listing now contains amended claims as canceled claims and original claims as new claims. The "detailed description of the invention" is labeled new and original to indicate that the original version is now the new version. The "abstract of the disclosure" is also labeled new and original to indicate that the original version is now the new version.

We thank you for the time you spent speaking by telephone with one of us to clarify the office 's point of view concerning election of species.

Sincerely and best regards,
